

## Peregrine Update

Once again the Peregrines at Christ Church have laid four eggs.

The first egg was laid overnight on March 28th – 29th and the second at 16.39 BST on March 31st. The third and fourth were probably laid at 7.20 on April 3rd and 5.50 on the 6th or very near these times. The dates were about a day and a half earlier than the last two years.

The predicted date for the first hatching is expected on about May 7th.

The eggs were photographed on the 18th April and are shown here along with the female fussing with them when she returned to sit on them again after a brief excursion. Hopefully all four will hatch unlike last year when only three hatched.
